

## **BLAZERS FUEL LOGS- PRODUCT INFORMATION SHEET**

### **Blazers Fuel Logs**

When you purchase a bag of Blazers Fuel Logs, you know that you have bought a bag of Blazers Fuel Logs that has been made 100% at our saw mill in Ruthin, North Wales.

The Blazers Fuel Logs are made from 100% Natural Virgin wood and contain no additives. All our wood is sourced from the UK and is FSC.

The Blazers Fuel Logs give a lovely natural flame in your open fire or wood burning stove, and give off a tremendous amount of heat and produce less tar, which will mean you will have a cleaner chimney.

With Blazers Fuel Logs, you have no sparks or spitting, so the family dog will fall asleep in front of the fire.

Blazers Fuel Logs are very clean and easy to handle. When placing on a fire we suggest that you break the log into smaller pieces, and do not over load your fire.

Blazers Fuel Logs have now been on the market for over 9 years. We supply the Blazers Fuel Logs in various European Countries and have stockists all over the U.K. We supply some 700,000 bags of Blazers Fuel Logs throughout the U.K. each year. You could have a stockist closer than you thought!

Blazers Fuel logs is a HETAS approved Fuel and each bag contains the HETAS Quality Assurance logo.

- Natural – 100% wood
- No additives
- No sparks or spitting
- Environmentally friendly
- Burn hotter and heat quicker
- Less tar and cleaner chimneys

### **BLAZERS Fuel Logs**

*These new fire briquettes are made of 100% compressed wood chippings and contain no additives*

### **BLAZERS Fuel Logs**

#### **ENVIRONMENTALLY FRIENDLY**

- less CO<sub>2</sub> emissions due to constantly burning at a high temperature
- use of pure wood chippings free of any additives
- the remaining ash can be used as a nutritious fertiliser

### **BLAZERS Fuel Logs**

#### **HIGH CALORIFIC VALUE**

- 5.5 kWh/kg, extremely long-lasting blaze
- 1000 kg BLAZERS are equivalent to approx. 4-5 m<sup>3</sup> of seasoned hardwood
- almost no heating power loss while storing (only 7% remaining humidity compared to 20% in conventional timber)

### **BLAZERS Fuel Logs**

#### **CLEAN AND SPACE SAVING**

- no resin, no insects
- due to compression little space needed for storage

### **BLAZERS Fuel Logs**

#### **SAFE**

- no dangerous sparks and spitting due to good combustion
- less smoke because of lower humidity
- ideal for open fireplaces and stoves
